

200603 M5 | L1 Lab Beta Plan Format - **Exercise 1:** Develop a Beta Plan for the Scenario.

Beta planning category	Beta planning consideration
Testing purpose	• Validate core functionality, usability, and reliability of the Mobile WB-3000 in real-world business and educational environments • Conduct a pilot beta test to identify usability issues, feature gaps, and pricing acceptance prior to launch
Internal readiness	• Product Management oversees testing objectives and issue prioritization • UX team leads usability testing and data analysis • Sales team conducts demos, collects feedback, and rates features • Operations and Engineering address defects and improvement requests
Tester recruitment	• 25+ external testers including educators, managers, mobile professionals • Testers sourced from partner corporations and educational institutions • Incentives include complimentary product unit, lunch, and early access
Targets	• Testers contacted via email and phone outreach • RSVP tracking and confirmation handled 60 days prior to testing
Testing objectives	• Achieve $\geq 90\%$ overall satisfaction score within two weeks • Identify and resolve $\geq 95\%$ of critical usability issues before launch • Validate pricing acceptance at $\leq \\$300$ per unit • Complete beta testing within the June testing window
Test management	• Pilot testing conducted over two weeks • Testing venues include LWT headquarters, three corporate locations, and two educational institutions • Large conference rooms provided at no cost
Communications planning	• Pre-test communications begin 60 days before beta • Daily internal status updates during testing • Post-test summary shared with stakeholders
Costs	• UX testing budget: \$25,000 • Complimentary units: indirect cost • Funding source: Operations (product sponsor)
Scheduling	• Beta testing period: June • Duration: Two weeks • Feedback incorporation completed prior to July launch
Legal	• Standard beta participation contracts required • Complimentary units cannot be resold for one year • Legal team manages agreements and compliance
Key performance indicators (KPI)	• Feature satisfaction ratings • Overall satisfaction score (0–100%) • Number of defects identified • Pricing feedback and acceptance • Test completion rate
